

Coronavirus Update from the PWSD District Manager

Recognizing that COVID-19 is affecting a growing number of people in our communities, we want our customers to know that we will continue to deliver safe and reliable water service.

As a public water system, we meet stringent state and federal standards as set forth by the EPA and Colorado Department of Health and Environment.

Our supply is safe to drink!

We will continue our operations to provide water to our customers!

With a goal of maintaining high levels of water services, while reducing public contact consistent with the direction of health organizations, *PWSD is temporarily closing general public access to its business office located at 18100 Woodman Drive, Parker CO*

The organization will remain in operation providing water and sanitation services, and while this facility is temporarily closed to the public, business services will continue as normal. We can still be reached by phone (303-841-4627) or email (info@pwsd.org).

It is anticipated that this temporary closure will remain in effect until April 17th, 2020 dependent on the COVID-19 situation.

To ensure reliability during this time we are also taking the necessary measures to protect our employees who provide these vital services to your homes and businesses.

We here at PWSD appreciate your patience, and thank you for your ongoing trust in providing high levels of service for safe and reliable drinking water.

Sincerely,

Ron R. Redd, P.E.

District Manager
